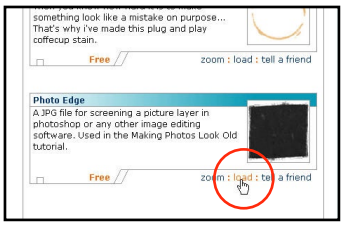
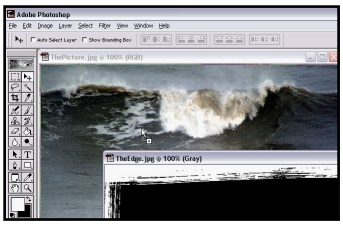
Aging Photos

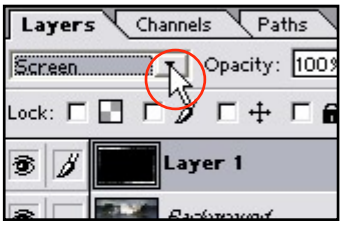
using Adobe Photoshop



1. Download the PhotoEdge.jpg from http://vinterstille.dk

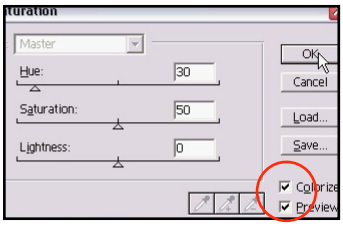
2. Start Photoshop and open the image you want to age and the PhotoEdge.jpg. Make sure they are the same size. **Drag** the edge onto the picture.





3. Choose **Screen** from the Effect dropdown box in the Layer tab.

4. Select the layer containing the picture and choose adjust -> **Hue/Saturation** from the Image menu. Turn on Colorize and set Hue to about 30, and Saturation to about 50.
Click OK



5. The final image should look something like this...

And thats it... Hope you found it usefull, for more - visit **http://vinterstille.dk**
