

Halftone Effects

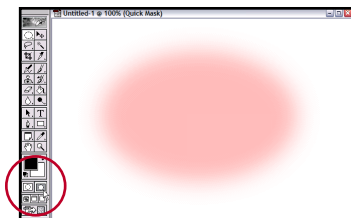

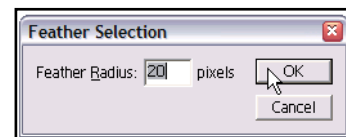

using Adobe Photoshop

HALFTONE
EFFECTS

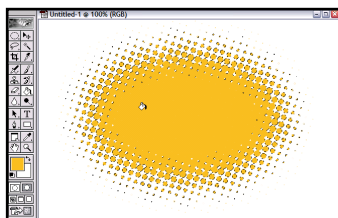

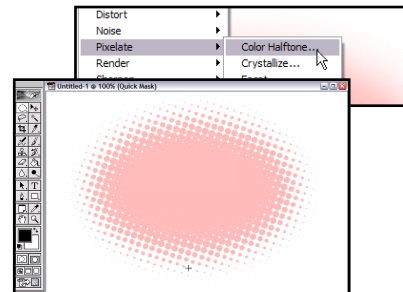

1. Open Photoshop and create a new document (600 x 400 pixels). Use the **Elliptical Marquee** tool to make an ellipse.

2. Choose **Feather** from the Select menu set Feather to 20 pixels.

3. Choose **Inverse** from the Select menu and go to **Quick Mask** mode.

4. From the Filters menu, select Pixelate -> Color Halftone, set the **max. Radius to 12 pixels**, click ok.

5. Go back from quickmask to **normal** mode. Choose **Inverse** again from the Select menu. **Fill the selection** with color of your choice.

And thats it... Hope you found it usefull, for more - visit <http://tutorials.vinterstille.dk>
